Stay connected to your machines

SMART CONSTRUCTION
Remote

Work shouldn't stop just because you're not on-site

Remotely send files from your office to target machines, easily search all connected assets or login to a machine and see what your operator is seeing with Komatsu Smart Construction Remote.

Designed for your job site

Smart Construction Remote software connects Komatsu Intelligent Machine Control models, Smart Construction retrofit, compatible aftermarket grade control systems and devices.

Multiple machine transfer

Transfer design files to multiple machines or devices on site with one click. Offline machines or devices can still receive file transfers up to 96 hours later.
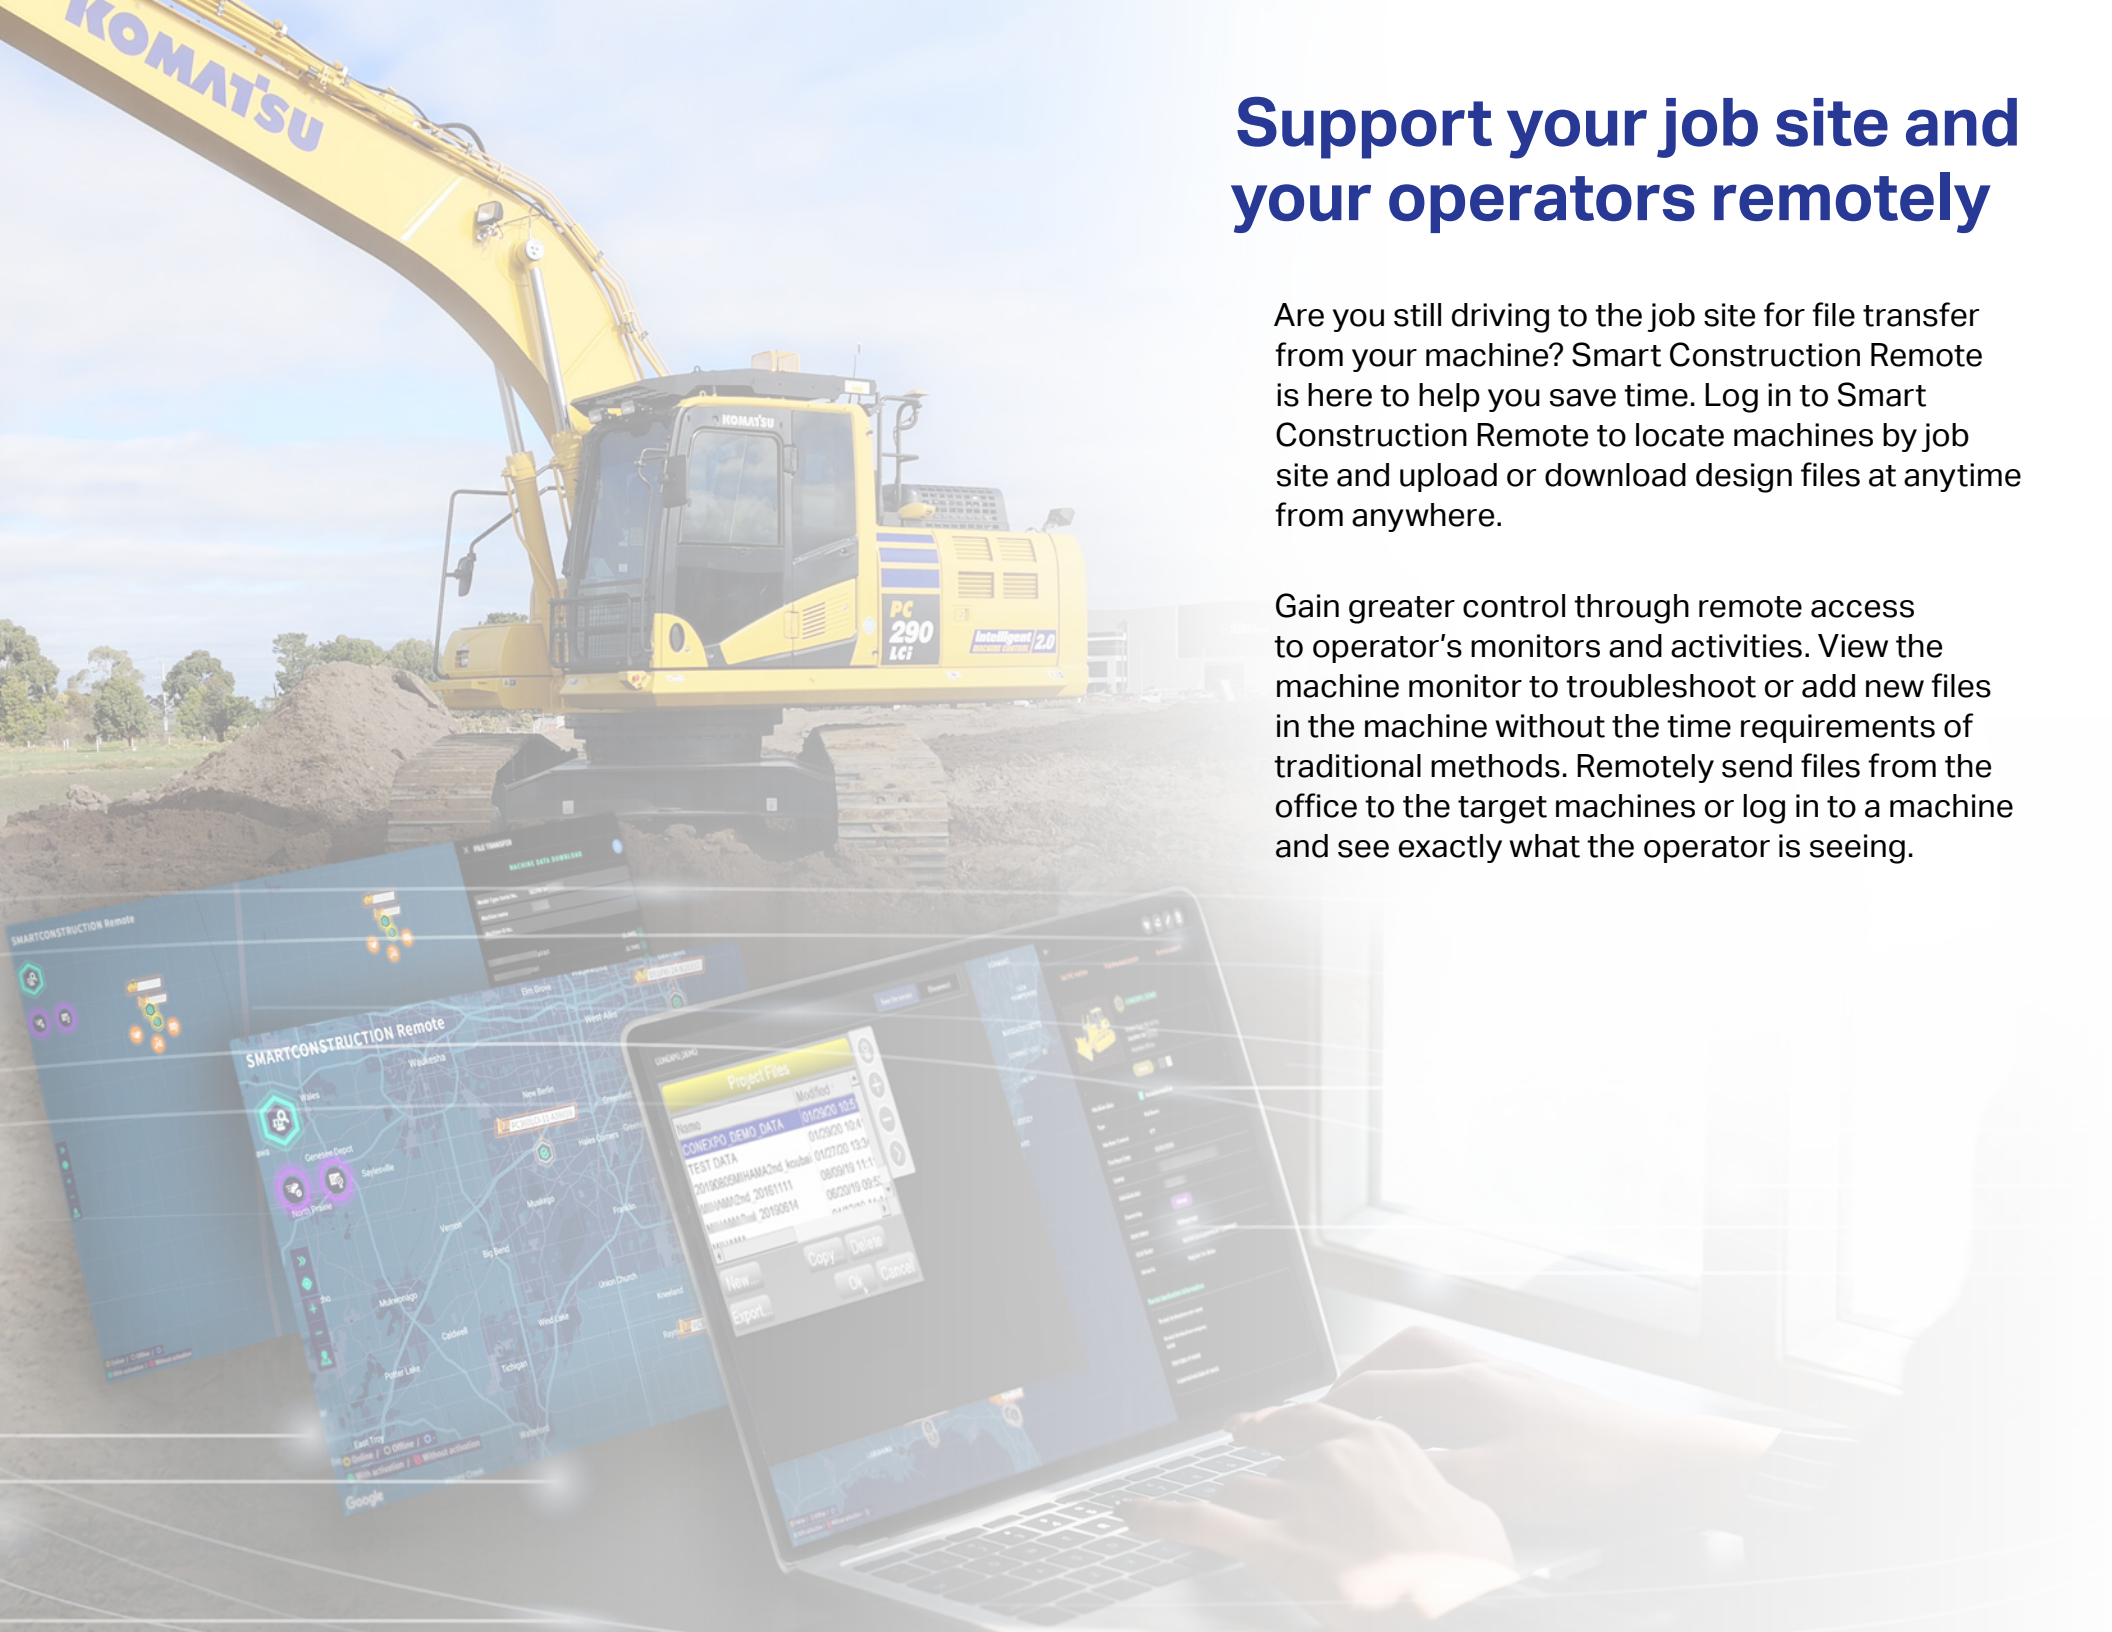

Operator support

Assist your operators remotely by seeing what they see and in real time.

Support your job site and your operators remotely

Are you still driving to the job site for file transfer from your machine? Smart Construction Remote is here to help you save time. Log in to Smart Construction Remote to locate machines by job site and upload or download design files at anytime from anywhere.

Gain greater control through remote access to operator's monitors and activities. View the machine monitor to troubleshoot or add new files in the machine without the time requirements of traditional methods. Remotely send files from the office to the target machines or log in to a machine and see exactly what the operator is seeing.

No matter where you are on your technology journey, our Technology Advisors can help guide and support you.
